

Included materials:

- 3 bottles of Non-Toxic, washable Watercolors - Blue, Yellow & Magenta.
- 1 Paint brush
- 1 White crayon
- 1 Straw
- Watercolor paper

Other things you might use; a green crayon, a black crayon or marker, a paper plate, cup or plastic container/lid. Also paper towel, rags or even an apron, *this might get messy!*

Helpful tips:

This project may get messy, so cover your table with plastic or paper, look through the re-cycling for supplies, use an old jar or can for water. Also, make sure you flatten out the paper and read all the instructions before you start your project.

Have Fun!

Monster Blow Art

1 Cover the table with a garbage bag, plastic table cloth or use the lid to a storage container and wear old clothes or an apron.

2 Using your paint brush, dip in water and make a large circle/ squiggly lines in the middle of your paper.

3 Squeeze a few drops of paint onto the circle (you can use two colors, do not use three or you will get a very dark color).

4 Take your straw and blow directly on top of your paint circle and aim it towards the edges of the paper, the water will go where it wants. Keep adding water and paint until you see a monster in your painting, then set aside to dry.

5 Add mouth, teeth, tongue, tentacles, fins, claws, anything that you want! Glue your googly eyes in place.

Wow, Watercolors!
3 projects - 1 kit!

"Thank You"

- To Patty Norzow for designing this project.
- To the Anonimo Foundation for providing the funding.

Flower Blow Art

1 Cover the table with a garbage bag, plastic table cloth or use the lid to a storage container and wear old clothes or an apron.

2 Using your paint brush, dip in water and make a large wet circle/squiggly lines near the top of your paper.

3 Squeeze a few drops onto the circle (you can use two colors, do not use three or you will get a very dark color).

4 Take your straw and blow directly on top of your paint circle, the water will go where it wants and create a beautiful bloom. Set aside to dry.

5 Make the stem/leaves using your green crayon or use your white crayon to draw the veins in your leaves where you would like them to be. Mix a few drops of yellow and a drop of blue in a plastic cup/paper plate. Paint your stem/leaves.

Starry Sky

1 Cover the table with a garbage bag, plastic table cloth or use the lid to a storage container and wear old clothes or an apron.

2 Start by drawing your mountains. Color them in with a marker or black crayon. Make them nice and dark.

3 Using your white crayon, make many star marks in the sky area, maybe even a shooting star or a constellation.

4 Take your paint brush, dip in water and wet the sky area (if you used

marker, try not to touch the marker with the water or it may bleed into your sky, if this happens, it is still okay).

If you used crayons for your mountains, you can also paint over your mountains to fill in any of the white paper.

5 Squeeze 6 or 7 drops of blue onto the wet sky and then squeeze a few drops of magenta here and there. Take your paintbrush and move the paint around until it covers your sky area.

If you want to make a cloudy looking sky, take a paper towel and gently press the painted sky in a few places to remove some of the paint (you can see where I did this in the top left).

Set aside to dry.

The paint will resist the crayon and your stars will appear as your painting dries!
